

Item: Opening, Category: Grand

At the birth of any enterprise there is that moment when, after careful planning, negotiation, gathered resources and material, assembly, valuation, reevaluation, polishing, and then poking/prodding the structure to test viability, the founders somewhat wistfully open the doors to the public. Today is that day for us, in that we are sharing with you a new web marketing and design company that is something that we hope that you will love as much as we do.

Welcome to a dynamic, fun, engaging, and innovative project, not just for us, but for you and your customer base. It's grand, and it's open.

Both Artificial (AI) and Human Intelligence

In addition to offering you over fifty years (yes, it really has been that long) of combined experience in online marketing, we invite you to join us as we both examine and leverage the emerging AI design, marketing and production tools that are transforming marketing and even core business functions.

AI Overview:

Regarding AI and the you ain't seen nothing yet syndrome (an essay)

There is a sense of jaw-dropping wonder in watching artificial intelligence (AI) tools such as ChatGPT at work. Any topic can be instantly summarized, with a credible level of detail and competence. Writing that would previously have taken (with research) an hour, now manifests in an eye blink.

Then there's the magic of AI design

Yes we have been pigging out

Sadly there are no duck analogies for the astonishing experience of the new design and efficient, low-cost AI marketing toolsets that we have been gathering to serve our clients.
